The Business of Flourishing explores a version of success that is backed by science; driven by your values and powered by love – love of knowing who you are; love of knowing what you value; and the love of knowing that your greatest success comes when you love yourself enough to bring what you value to everything you do and create.

The Business of Flourishing is a comprehensive, four-part applied learning experience designed to be delivered virtually or in-person. TBOF can be divided into separate, interconnected but independent learning blocks grounded in the science of positive psychology and human flourishing.
